

OKLAHOMA STATE UNIVERSITY - BUILDING DESIGN STANDARDS

PART 1 GENERAL

1.01 QUALITY ASSURANCE:

A. Qualifications:

1. Installer shall be a water repellent coating firm specializing in special coatings, experienced in the application of the types of water repellents required with not less than five years of continuous, successful experience.

B. Manufacturer shall certify application procedures including:

1. Coverage rate.
2. Temperature and site conditions.
3. Conformance with manufacturer's recommendations.

C. Indicate laboratory test results for water repellents on substrate simulating Project conditions. Use same materials and methods of applications to be used on the Project.

D. MockUp: Apply water repellent to mockup or other sample, partial coverage, before proceeding with installation. Obtain approval of final appearance. Mockup will become the standard of quality for judging completed work.

1.02 WARRANTY:

- A. Provide manufacturer's five year written warranty covering material and application.
